For the first time a patient has died from an operation for congenital dislocation of the hip after the Loretz method.

OSTRICH LOGIC.

"When I can't see danger there is no danger." That's the logic of the ostrich which hides its head and exposes its body to the hunter. There are not a few people who seem to have gone to the ostrich to learn logic. The most dangerous enemies of humanity are the enemies which can't be seen, the disease breeding microbes which infect the blood. It is harder to get the microbe out of the blood than to keep it out, but Dr. Pierce's Golden Medical Discovery does both, by purifying the blood and then keeping it pure.

If there are eruptions on the skin, boils, pimples, sores or other signs of impure blood, use Doctor Pierce's Golden Medical Discovery, which will purify the blood and cure the eruptions which come from it.

"My blood was all out of order, and I had to go to the doctor," writes Mrs. James K. Moss, New London, N.Y. "He gave me medicine which helped me for a short time. In the winter of 1895 I got worse than I had ever been. My tonsils were enlarged and my neck swollen all out of shape; my throat was sore and I could not cure it. My husband went for the doctor, but he gave me no encouragement. He helped me a little, but it did not last long. He attended me for twelve months, when I heard of a lady whose condition was like mine, who was taking your medicine and was getting well. So I secured some of the medicine and began taking it. In one week I was able to do my cooking. When I began taking the medicine I could sit up only a few minutes at a time, and I could rest or sleep only a little while at a time. My throat was so sore at times I could not even swallow sweet milk, and my tonsils were full of little eating sores. My left side was swollen out of shape and I could hardly get my breath. The doctor said I would not get well, but three bottles of Dr. Pierce's Golden Medical Discovery, three bottles of his 'Pelle's,' three bottles of Dr. Sage's Catarrh Remedy and the use of salt water did the work and cured me."

Dr. Pierce's Pleasant Pellets cure constipation and its consequences.

Prosperous And Happy.

The Democrat feels this morning to congratulate itself and thank its patrons for constantly increasing business. At no time since its birth, nearly three years ago, has it enjoyed so great or so steady a patronage as now. For a long time we were very much discouraged. We were beset with difficulties which at times seemed almost insurmountable and human endurance was almost stretched to the limit, but we persevered in the face of trials and tribulations and continued to work when there seemed poor prospect of recompense. It has been an awful uphill fight, but we have won and today we feel that we are on a firm foundation and rising ground. At no time since the paper began publication has a Sunday supplement been absolutely necessary until several months since, and never until this year did it become a permanent feature. Our business demands better quarters and increased mechanical facilities, both of which will be provided in the near future. To those who have stood by us through evil as well as through good times, we return our sincerest thanks and promise in the future as in the past to devote our time, money and whatever of talent we may possess to the making of a paper that every citizen can read with pride.—Lexington Democrat.

DR. W. B. O'BANNON

Was born in Garrard, near old Fork Church and was the third son of the talented and educated Capt. Algernon Sidney O'Bannon, who was known as the "living encyclopedia." Capt. O'Bannon moved his family to Cass county, Mo., where the doctor was raised on a farm. Dr. O'Bannon first intended being a farmer, but when he grew to manhood he decided to gain more knowledge and entered college and later began the study of medicine. He graduated from the Eclectic College of Medicine in Cincinnati in 1883 with first honors of his class of 40. He later took a post graduate course in the New York Polytechnic. He located at Kingsville, where he was unknown, but was successful from the start; in fact his practice grew so large that he could hardly attend to it all. In 1886 the doctor married Mrs. Ellen Albright, of Brodhead, a splendid woman, and the union was a most happy one until it was broken by her death last year. Two daughters and two sons are the fruits of the marriage, but besides raising them, Dr. and Mrs. O'Bannon partly reared and educated four orphan girls and placed them in positions where they are self-sustaining. Dr. O'Bannon has given over \$20,000 in professional services, medicine and money to the poor of Lincoln and adjoining counties and is a liberal donor to all good causes. He is a good financier and although he started life without a cent and paid for his schooling, he is to day one of Stanford's most solid citizens as well as one of her very best. He moved here some eight years ago, and like all people who live in Stanford, he thinks it the only town on the map.

The arrivals of immigrants in the United States for 1902 were 739,289, a greater number than in any previous year except 1882, when the total of arrivals was 788,992. The tide sets in heavily for 1903. In January 31,857 immigrants were landed, making no account of persons who crossed the frontier without an official note. This shows a gain over January arrivals for 1902 of 8,022. Should this rate of increase be maintained, a new record will be made. America, beyond all other parts of the habitable globe, still holds out superior inducements to the wanderers of mankind who seek to better their condition.

MR. BRYAN says Senator Gorman is a man of great force and extended legislative experience. Probably no other man in Washington is so well acquainted with public and parliamentary procedure. Besides this, he is a man of exemplary personal habits, of indefatigable industry and perfect self control. In other words he has most of the qualifications considered necessary for leadership and if his sympathies were only with the people he would be an admirable man to speak for the Democrats in the Senate but he fails at the crucial point. We fear Mr. Bryan is becoming captious. He oughtn't to expect a man to be perfect.

THE world's largest construction syndicate is being formed to bid on the contract for building the Panama canal. It is estimated that between \$135,000,000 and \$145,000,000 will be expended before the canal is complete, and the syndicate expects to make a proposal to hand over to the government the waterway finished to the smallest detail. The work should be done by contract by all means for results show overwhelming argument in favor of contract work as distinguished from that done under the direct supervision of the government. It is thought that the work can be completed within the next 10 years.

A BARREL of whiskey from Cincinnati addressed to King Edward is now on its way to England. The barrel is of the average size for long-distance shipping and contains 45 gallons of good old Bourbon. This is the fourth barrel of the same liquor purchased for His Majesty and shipped to him since his accession to the throne. The information is further given that the whiskey is the real Kentucky brand, and the incident shows two things: that Edward must be a pretty strong drinker, and very foolish to get Kentucky whiskey from Cincinnati, from which no good thing was ever known to come.

IF the naming of postoffices for them is an indication of the popularity of presidents, Cleveland has got most of them beat a block and even leads the father of his country and the immortal Lincoln. There are seven Pierces, 15 Roosevelts, 17 McKinleys, 20 to 29 Adamses and as many Jeffersons, Madisons, Jacksons, Johnsons, Grants and Garfields, 20 Washingtons, 33 Monroes, 31 Lincolns and 32 Cleverlands.

JINGO, an elephant, said to have been larger than Jumbo, died at sea March 12, on the steamer Georgia, bound from Liverpool to New York. The great brute had not traveled since infancy and began to pine away as soon as the ship went out of sight of land. It is appalling to think of the amount of sea sickness that could be crowded into an elephant weighing six tons and standing 12 feet high.

CAPT. T. T. HEDDER, of Scott county, the next Commissioner of Agriculture, made friends of all who met him here Friday. He is a splendid type of the Kentucky gentleman and is a democrat tried and true. He went from here to Lancaster, where he met with as warm a reception as he did here.

THE wedding of a Negro and a white woman took place at the First Presbyterian church in Washington. The late Rev. T. DeWitt Talmage formerly occupied the pulpit of this church. A coat of tar and feathers for each of the participants would have been a most appropriate bridal present.

A TACOMA, WASH., man fell dead with \$5,000 in money in his pockets. A tenth of that enormous amount would be sure death to the average Kentucky editor if it should happen to find its way into his pockets.

THE utter futility of speech is shown in the case of Senator Morgan. He uttered more than a quarter of a million words, yet only Pettus, Teller, Daniel and Martin voted with him against the canal treaty.

A CENTURY subscriber recently wrote to the publishers and the publishers wrote to the insurance companies inquiring what the charge should be for a life subscription to the Century for a man 33 years of age. American experience table of mortality, assuming money to earn 3 per cent. annual interest, decided that a man 33 years of age should pay \$31.64 for a life subscription to the Century. We also figure a like amount for the INTERIOR JOURNAL. Send check at once as the price increases as your chances of life decrease.

SAFF-SYDE SOAP.—Dr. R. A. Jones, the dentist, is having phenomenal success with his Saff-Syde soap, which is not only a most excellent toilet and laundry article, but a very unique advertisement. The label on which any business may be advertised is put on with a preparation which prevents its coming off and the advertisement lasts as long as there is a particle of the soap in toilet size it is the prettiest and most neatly packed soap on the market and the way it sells is a caution. Severance & Son, John P. Jones and Craig & Hocker handle Saff-Syde here and they find a difficulty in keeping it in stock, so great is the demand for it. The soap is put up by a Cincinnati firm under the supervision of Mr. Wallace W. Withers, who is assisting Dr. Jones with his popular patent. The doctor has been offered a handsome sum for his patent right of the advertising soap, but he declined, believing it too good a thing to sell. While he personally looks after the soap business to a considerable extent the genial doctor doesn't let it interfere with his dental practice, which continues to grow.

PIG SUCKS COW.—Mrs. James J. McKloney, of the Mt. Salem section, had been missing milk from one of his cows for some time and he thought that somebody was milking her. To his surprise the other day he saw a pig sucking her for dear life. The cow stood as still as if the pig was her offspring.

Gillespie is field manager for the Clifty Creek Co. and has an interest in its leases and holdings.

BOSLEY.—Capt. Jack Bosley, known to almost every man, woman and child in this section and loved by them all, died at his home in the country at 6 o'clock Saturday afternoon, aged 79, after a short illness. He was in Stanford only a few days before his death and was seemingly in good health and spirits. As usual, he met with a most cordial greeting for "Uncle Jack," as he was affectionately called, was popular with all classes and ages. Little did those who gave him hearty handshakes think that it would be his last trip to town. Had they known it, his presence would have caused almost as much sadness as the announcement of his sudden death has. Mr Bosley was a Mexican war veteran, and his death leaves only two in this county of those who fought for that cause, Messrs. J. T. Harris and Rueben Williams. Many years ago, Mr. Bosley married a Miss Lytle, sister of the late Judge Lytle, and she and seven children, all grown, survive. They are Messrs. Stewart, John, Robert and Leslie Bosley, Messdames Dr. Bosley and Smith Yowell and Miss Josie Bosley. In the loss of a kind husband and indulgent father they have the sympathy of the entire community. After services at the late home at 10 o'clock yesterday morning by Eld. Joseph Ballou and Rev. J. W. Hagin the remains were interred in Bellevue Cemetery, Danville.

Three men were injured by the explosion of a dynamite blast in Trigg county. Officials of the Mormon Church will appeal to Gov. Odell for the pardon of William Hooper Young.

J. W. Bass, alleged strangler of Mrs. Martin, at Lexington, is reported to be showing signs of insanity.

R. T. Wright was acquitted in the Pulaski court for killing George Baker. He claimed it was an accident.

The New Mexico Legislature voted an appropriation of \$30,000 for an exhibit at the St. Louis World's Fair.

Managers of the three big vaudeville theaters in Chicago have adopted stringent rules against profanity or vulgarity on the stage.

The United States has managed to reach a thorough understanding with everybody else about this canal matter—except Senator Morgan.

John Hensley, who killed "Bud" Spicer at Jackson, Breathitt county, has been found guilty and sentenced to sixteen years in the penitentiary.

As the result of a family quarrel in which a lighted lamp figured, Mrs. Catherine Schoonover, of Allegheny Pa., is dead and her husband badly burned.

At Bear Lake, Mich., Joseph Bradley, a crazy farm hand, who had been discharged, shot and killed Mrs. F. E. Bowerman, wounded her daughter and committed suicide.

The mother of United States Trooper Richter, who was killed in the Philippines, charges that Gen. Davis had dipped full of ice water poured on his head until he was dead.

The body of John Titas, a union miner, was found on the railroad track near Nortonville. It is believed he was murdered and his corpse placed there, that it might be mangled by the train.

The body of the maniac who engaged in a desperate battle with a posse in Marion county, in which he was killed, was Will Crume Malta. He was thirty years old, and came from Botland, Nelson county.

Noble Larner, aged seventy-three, and prominent in church work in Washington, died suddenly in the Sunday school room of his church after reading his annual report as treasurer of the Board of Trustees.

The president is far from being pleased over the results of the extra session of the senate and it is said he makes no attempt to conceal his ill temper. The Panama canal treaty was ratified but this can hardly be in the nature of a feather for the president, for he originally indorsed the Nicaraguan route, and it was Hanna's influence which switched it to the Panama.

The outcome of the Cuban treaty is wormwood and gall to Roosevelt. This was his special hobby, and with the adjournment of the special session he finds this treaty suspended between heaven and earth. All along the prominent Republican leaders have meant to reject the treaty and have simply taken the indirect rather than the straight method to strangle it. Next winter, it is said, it may never be heard of as there is a decided opposition to it in the lower house.

Two of Mr. Roosevelt's appointments were not confirmed. Dr. Crum's and Hynde's and this adds sorrow to his grief-stricken heart. All this has made him tire of life and he goes to the woods with yearnings for its solitude.

Wakeful Children.

For a long time the two-year-old child of P. L. McPherson, 59 N. 10th St., Harleburg, Pa., would sleep but two or three hours in the early part of the night which made it very hard for her parents. Her mother concluded that the child had stomach trouble, and gave her half of one of Chamberlain's Stomach and Liver Tablets, which quieted her stomach and she slept the whole night through. Two boxes of these Tablets have effected a permanent cure and she is now well and strong. For sale by Craig & Hocker.

Mothers' societies in St. Louis have adopted a rule that none but mothers who can file at least one baby as an exhibit, may be members. This is eminently proper. What does the average woman who is not a mother, know about mothers anyway? And what right has a woman who has no baby to tell one who has how to raise it? Practice is worth more than all the theories that could be advanced in such matters.—Lexington Democrat.

Geo. T. Wood bought a car load of sheep at 3 to 4c.

THE Lexington Democrat is giving free to every new subscriber a very useful and valuable present in the shape of a map of the world, of the United States and of Kentucky, with interesting and important data, besides the flags and arms of all nations, the pictures and autographs of the presidents, etc. The maps were made expressly for the Democrat and are readily worth the price charged for the paper. Send \$5 for a year's subscription or \$3 for six months and you will receive one, postage prepaid. It is the most complete map and chart we have ever seen.

Danger of Colds and Grip.

The greatest danger from colds and grip is their resulting in pneumonia. If reasonable care is used, however, and Chamberlain's Cough Remedy is taken, all danger will be avoided. Among the tens of thousands who have used this remedy for these diseases, we have yet to learn of a single case having resulted in pneumonia, which shows conclusively that it is a certain preventive of that dangerous disease. It will cure a cold or an attack of the grip in less time than any other treatment. It is pleasant and safe to take. For sale by Craig & Hocker.

Platinum, which is indispensable in some instruments of precision and is useful in the arts particularly, because when imbedded in glass it does not crack it by unequal expansion, is still much more valuable than gold. Nineteenth of the world's platinum (about 8,800 pounds) comes from the Ural mountains, which enables Russia to control the price.

The grease in the wool of sheep is exceedingly valuable. A great deal of it is lost when the fleece is washed before shearing. A government expert says: "It is safe to say that from two to three million dollars' worth of wool fat and potash are run down the streams and wasted annually in the United States."
